Pittsfield, IL 62363**

## **Farmers State Bank 2008 Plot Results**

Farmers State Bank is pleased to present the 2008 plot results. The plot consisted of Rootworm and Rootworm stacked genetics. The plot had 19 seed companies and 65 varieties. We feel this program is a great educational tool which can enhance the production and profitability of West Central Illinois.

The growing conditions started out the year very wet and unfavorable. This continued throughout the growing season. Yields reflected nitrogen loss, which affected yield potential. With various soil types, lighter soils in turn had the best yields.

*Thank you-* There are so many people who put a great deal of time, energy and effort into making this plot one of the best in the area. We would like to list everyone in this letter but will fear we will forget someone. We would like to take this opportunity to thank all the seed companies for donating the seed and their involvement in the plot. A special thanks goes out to the owners of the Irick Farm, as well as Eugene Myers and Dennis Dell.

We trust this information will be useful to your farming operation. If you have any questions, please don't hesitate to contact us at Farmers State Bank, (217) 285-5000 or visit us on the web at [.farmersstate.](http://farmersstate.com)

Sincerely,

Farmers State Bank

John Harris  
Vice President

Farmers State Bank

Adam Lawson  
Vice President
