Farmers State Bank Test Plot Results

Farmers State Bank is pleased to present the 2005 plot results. The plot included Conventional, BT, Rootworm, and Rootworm Stacked genetics. The plot had 20 companies representing 59 different varieties. The quality of the plot is a product of the surrounding leaders in agriculture wanting to educate agricultural producers on the new technologies of seed.

The growing conditions were unfavorable this year due to frost damage, lack of rain fall, and periods of heat stress. The yields of the plot turned out very well considering these conditions.

Thank you –Farmers State Bank would like to thank the owners of the Irick Farm, as well as Eugene Myers, Dennis Dell, and Bret Lipcaman for all the work they put into this year’s plot. Along with many others, these people put a lot of energy and effort into making this one of the best plots in the area. Finally, we would like to thank all the seed companies for their involvement in our plot, donating the seed and participating in our plot tour.

We hope that this data will be useful to you in your farming operation. If you have any questions, please contact us at Farmers State Bank, (217)285-5000 or visit us on the web at www.farmersstate.com.

Sincerely,

Farmers State Bank
